

AutoCon

Potting System

AGS are proud to announce the new innovative *AutoCon* Potting System. *AutoCon* is a patented system that has undergone rigorous internal and external testing to come up with a revolutionary potting system that offers the modern nursery manager a vast array of benefits.

The *AutoCon* system arrives to your nursery on a pallet with 240 x 200mm slimline or euro pots full of the potting mix of your choice. The pallets are then able to be split in half giving you 120 x 200mm pots at a weight that the average tractor can manoeuvre and providing a suitable working height. Production staff remove the lid exposing a 2" void (hole), the production person then simply places the tube into the void and the product is planted.

Talk to AGS today to find out more about *AutoCon* or visit us at www.agsolutions.net.au

Advantages

- ✓ **Save time & money**
- ✓ **Reduce labour requirements**
- ✓ **Produce premium quality stock**
- ✓ **Minimise overheads**
- ✓ **Gain production flexibility**

AutoCon

Potting System

AutoCon allows Nurseries to pot stock when it suits and with minimal staffing requirements. Usually if the dispatch area is busy, production quite often misses out due to the large number of staff required to run the potting machine, *AutoCon* will allow you the flexibility to have as little as one person potting.

The *AutoCon* system arrives to your nursery as 240 x 200mm slimline or euro-style plastic pots on a standard pallet. The *AutoCon* system has a pallet located in the centre of each pallet to allow for tractors that do not have a large lifting capacity and more importantly to allow production staff a comfortable working height.

The recommended method of use requires that the production is performed at the site of final placement in the nursery. This method allows the maximum benefit to be obtained from the *AutoCon* system.

AGS recommend that *AutoCon* pots are stored in a cool dry area out of direct sunlight prior to use. *AutoCon* pots should be used within 4 weeks from the date of manufacture. All *AutoCon* lids pallets and associated transportation aids remain the property of AGS.

Call AGS today to arrange your pallet of *AutoCon* pots.

Pots being laid out directly into beds to allow for ease of production
