

SaturAid

Wetting Agent

- ✔ Saves water by up to 50%
- ✔ Available in granular or liquid
- ✔ Non-toxic and safe for use on plants
- ✔ Environmentally friendly and long lasting

Water is a precious resource, and an increasingly expensive resource also. SaturAid Wetting Agent from AGS drastically improves the ability of soil or growing media to retain water, reducing the need to reapply as frequently. SaturAid also improves the take up of fertilisers and reduces water run-off.

Whether it's used on lawns, gardens or incorporated into potting mix, SaturAid will improve growth rates as well as encouraging a more vibrant root system. Lasting up to nine months, SaturAid is one of the longest lasting wetting agents on the market today.

SaturAid is non-toxic, environmentally friendly and completely safe for use on plants, even through irrigation systems. Some wetting agents on the market can cause leaf burn and other issues, however SaturAid has been proven to be safe even when used at four times the recommended rate of application.

SaturAid works by breaking up the surface tension of the water and allowing it to flow more readily, and will reduce “beading” of water in hydrophobic soils. This improves the penetration of water to all areas of the soil where the plant can access that water.

Application Rates and Directions

Granular SaturAid		
Container Type	Incorporation Rate	Common Measure
Plug and cell tray media	1-2 grams per litre of growing media	
Hanging Basket Type/Size	Top Dressing (grams per container)	
250mm	9g	3 level teaspoons
300mm	12g	4 level teaspoons
Container Type/Size		
200mm	6g	2 level teaspoons
250mm	9g	3 level teaspoons
300mm	18g	3 level teaspoons
400mm	30g	4.5 level teaspoons
500mm	60g	9 level teaspoons
Landscape and Turf	Application Rate Per 100m ²	Area Covered Per 20kg Box
Heavy Soil	4kg	500m ²
Medium Soil	5kg	400m ²
Light Soil	6kg	333m ²

Liquid SaturAid		
Application	Application Rate	Directions
Turf and Lawns	500ml per 300lt of water covers 100m ²	Water in well during warm conditions.
Turf and Lawns (Monthly Top Up)	170ml per 300lt of water covers 100m ²	
Turf and Lawns (Fortnightly Top Up)	90ml per 300lt of water covers 100m ²	
Growing Media	225ml per cubic metre	Mix Thoroughly. For improved longevity and more efficient mixing, AGS recommends using Granular SaturAid.
